Alert Management

### Experience

#### ➤ DevSecOps Consultant • SimTLix/intive - 2021 – Present

Tasks include debugging developer issues when deploying to AWS environments through GitLab pipelines, implementing new solutions to create reports, sharing new technologies and processes with the team. Implementing security jobs and policies into CI/CD pipelines.

#### ➤ DevOps/Cloud Support team • Resolvit - 2021

Tasks included creation and decommission on EKS clusters through terraform plans, creating resources based on client requests, monitoring 70+ clusters, granting access to users, responding to client requests for new features on the environment.

#### ➤ ITO Service Delivery Consultant • UNIX SA • DXC Technology - 2020 – 2021

Tasks included applying patches to the environment, working with different UNIX distros (including RHEL 5/6/7, CentOS 8, HP-UX, Solaris 10/11), troubleshooting client requests through ticketing system (SM9 and SNOW), analyzing and reducing FS space issues as well as performance issues, RCAs for major issues, performing modifications to monitoring agents based on application updates

**Highlight:** assist in implementing Nagios monitoring solution in Azure

#### ➤ ITO Service Delivery Consultant • Service Deliver Coordinator • DXC Technology - 2018 – 2020

Tasks included monitoring client's infrastructure, following procedures in case of escalations, working closely with different teams.

### Leadership

I've coordinated a nine people team, after my previous lead left the company. It was a really nice experience, since the team has a lot of exposure to client requests.
